Professional Experience

UI/UX Engineer

IgnitionOne

July 2015 – Present Remote

Responsible for implementing the UI and UX for an award winning suite of products using bleeding edge technology and industry best practices.

Successfully rewrote a new core product in Angular 1.* and am now utilizing the UI built for other company products.

Technologies used: Angular 1.*, Node, Stylus, Jade, Gulp, Webpack, Bootstrap, Npm and Bower.

UI/UX Engineer

Coding Zeal

August 2014 – July 2015 Remote / Medford, OR

Design and created intuitive user interfaces for the web and mobile application world.

Built a web site for OneSight.org utilizing head tracking technology to simular near-sightedness while a video promoting awareness of blindness.

Technologies used: Ruby on Rails, Ember, Javascript

Owner

Symplex

January 2014 – Present Grants Pass, OR

Roles and responsibilities include:

- Client acquisition - All clients were referred by another client or stopped into the office for a face to face consultation.
- Project planning - Establish a road map for the project; time frames, meetings, requirements.
- Design - Wireframes, photoshop mock ups, branding.
- Develop - Write code for web, mobile, and tablet design experiences.
- Hosting - Manage hosting for multiple web applications using Amazon Web Services.

Consulting Software Engineer

Knotice

July 2013 – January 2014 (7 months) Grants Pass, OR

Roles and responsibilities include:

- Develop - Write code for web, mobile, and tablet design experiences.

All solutions were built using these technologies:

- HTML5, CSS, JQuery, NodeJS, Jade, Stylus, JQuery, PostgreSQL, ASP.NET, MVC and SQL Server.

Clients included:

- Canon
- Charter Communications
- Dollar General

UI/UX Designer

Motorcycle Superstore

February 2013 – July 2013 (6 months) Medford, Oregon Area

- Participate in the planning process for new features and project.
- Develop and iterate on concepts for web, mobile, and tablet design experiences in a fast-paced team environment.
- Develop and contribute to wireframes, mockups, and interactive prototypes.
- Production of designs and documents for presentation to developers, managers, and senior executives.
- Refined designs, considering live customer data, market research, and usability studies.
- Assisted in the development and evaluation of personas, user stories, and usability studies.
- Work with a highly experienced development team to implement solutions based on your designs.

Projects:

- Responsive Web Site - Designed and implemented many aspects of a re-design of <http://www.motorcycle-superstore.com> to be a responsive e-commerce platform.

Senior Mobile Engineer

Knotice Ltd

January 2008 – June 2012 (4 years 6 months)

Roles and responsibilities include:

- Develop - Develop new features, enhance existing features and fix bugs for a marketing platform used for bulk Email Sending (millions/month), SMS, Content Management, Segmentation, Website Analytics and Profile management.

Projects:

- Public API - Developed a REST and SOAP API for the marketing platforms core services, including email sends, content creation, user management, sns and reporting.
- UI Tool Kit - Developed a suite of custom Web Controls used by other developers for rapid development of custom one-off web applications. Custom controls included a gridview, autocomplete, tooltip, modal dialog, paging, listview, textbox and buttons.

Software Engineer II

2004 - 2008 OEConnection LLC

July 2004 – August 2008 (4 years 2 months)

Responsibilities include working with product managers to define project requirements, identifying deliverables, estimating development efforts, and managing project timelines. While contributing to project deliverables myself, I also held additional responsibilities for directing and mentoring less experienced developers.

Education

Bloc
